

#2458 – Blade Repair Technicians

Altura, a division of IRISNDT, has been supplying height related services to the wind industry in the USA, Europe, and Canada for almost 20 years. Our commitment to safety, training, and quality of work has ensured our service capabilities continue to grow – year after year.

IRISNDT is a world leader in non-destructive testing (“NDT”), providing Conventional NDT, Advanced NDT, Asset Integrity Engineering, Turnaround, Routine Inspection, Light Mechanical, Rope Access, and Heat Treatment services.

Established in 1953, the Company services the oil, gas, chemical processing, petrochemical, wind and renewables, power generation, and mining industries. A growing organization with a great demand for their services in the market, the Company employs over 1000 staff in the USA, plus 600 staff in Canada, the United Kingdom, and Australia.
